## Profile

Skilled computer engineer and dot net web developer with software engineering knowledge .  
Trained and educated on self learning , problem solving , algorithms , software design patterns and principles, have a good communication, presentation and leadership skills, productive within teams or as individual .

## Objective

To gain new experience and to utilize my interpersonal skills to achieve these goals .  
With more and more experience , I can gain more great and important position as a developer .

## Education

- From 2013 to 2017 in Faculty of engineering minia university .  
Degree : Bachelor's Degree in Computer engineering  
Grade : very good  
Major : Computer engineering    Minor : Information Systems
- From January 2020 to April 2020 in information technology institute minia branch .  
Track : Full stack dot net development

## Graduation Project

Automation railway station which solving many railway problems . With mixed hardware and software technologies build website and the body of the train with Arduino board and makes relations between website as a station and the train itself making the railway system automated .

Grade : very good

## Military Service

Did the military service from October 2017 to December 2018.  
Work in information system branch with networking (Local Area Networking) .

## Certificates

Certified computer engineering from computer and system branch .  
Information technology institute ( ITI ) full stack dot net development track minia branch .

## Skills

Technical :

- Object Oriented Programming using C# Language and Design patterns .
- Basic Front end technologies to design a complete responsive web site .
- Angular7 framework to built websites and related it with api .
- Back end asp.net mvc5 and mvc core technologies .
- Design a complete database with sql and also with LINQ code first technology .
- Dealing with APIs , joins front web site and back end with api requests and responses .
- Basics dealing with local area and wide area networking and there relations .

Personal :

- Self-learning and ability to work on new technologies .
- Leadership skills and can work smoothly with any team .
- Hard working and ability to work under stress to deliver my work in time .

**Programming and Scripting Languages**

- HTML , HTML5 , CSS , CSS3 and bootstrap4 .
- Javascript ,Typescript and ECMAscript (ES5) .
- Angular7 framework .
- SQL server database .
- C# programing language with object oriented programming and linq .
- Asp .net mvc5 and mvc core frameworks .
- API using asp.net mvc5 and mvc core .

**Strength Points**

- Ability to learn from mistakes .
- Adaptable with any emergency situations .
- Creativity and like learning new technologies .
- Self learning and problem search .

**Volunteering**

Assistant with some activities in faculty of engineering like IEEE .
